Get an Overview of the AZ-700 Certification:

Who should take the [AZ-700 exam](#)? This is the first question that comes to a candidate's mind when preparing for the Designing and Implementing Microsoft Azure Networking Solutions certification. The AZ-700 certification is suitable for candidates who are keen to earn knowledge on the Microsoft Azure and grab their Microsoft Certified - Azure Network Engineer Associate certification. When it is about starting the preparation, most candidates get confused regarding the study materials and study approach. But AZ-700 study guide PDF is here to solve the problem. AZ-700 PDF combines some effective sample questions and offers valuable tips to pass the exam with ease.

Why Should You Earn the Microsoft AZ-700 Certification?

There are several reasons why one should grab the AZ-700 certification.

- The Designing and Implementing Microsoft Azure Networking Solutions certification proves to be one of the most recognized certifications.
- The certification badge proves the knowledge of the candidate regarding subject matters and makes his resume presentable to potential employers.
- Thus earning the [Microsoft Certified - Azure Network Engineer Associate](#) is a powerful qualification for a prosperous career.

What is the Microsoft AZ-700 Designing and Implementing Microsoft Azure Networking Solutions Certification Exam Structure?

Exam Name	Microsoft Certified - Azure Network Engineer Associate
Exam Code	AZ-700
Exam Price	\$165 (USD)
Duration	120 mins
Number of Questions	40-60
Passing Score	700 / 1000
Books / Training	Course AZ-700T00: Designing and Implementing Microsoft Azure Networking Solutions
Schedule Exam	Pearson VUE
Sample Questions	Designing and Implementing Microsoft Azure Networking Solutions Sample Questions
Practice Exam	Microsoft AZ-700 Certification Practice Exam

Enhance Knowledge with AZ-700 Sample Questions:

Question: 1

You fail to establish a Site-to-Site VPN connection between your company's main office and an Azure virtual network. You need to troubleshoot what prevents you from establishing the IPsec tunnel.

Which diagnostic log should you review?

- a) IKEDiagnosticLog
- b) RouteDiagnosticLog
- c) GatewayDiagnosticLog
- d) TunnelDiagnosticLog

Answer: a

Question: 2

You have an Azure application gateway for a web app named App1. The application gateway allows end-to-end encryption. You configure the listener for HTTPS by uploading an enterprise-signed certificate.

You need to ensure that the application gateway can provide end-to-end encryption for App1. What should you do?

- a) Increase the Unhealthy threshold setting in the custom probe.
- b) Enable the SSL profile to the listener.
- c) Set Listener type to Multi site.
- d) Upload the public key certificate to the HTTP settings.

Answer: d**Question: 3**

You are planning an Azure Point-to-Site (P2S) VPN that will use OpenVPN. Users will authenticate by an on-premises Active Directory domain.

Which additional service should you deploy to support the VPN authentication?

- a) an Azure key vault
- b) a RADIUS server
- c) a certification authority
- d) Azure Active Directory (Azure AD) Application Proxy

Answer: b**Question: 4**

You have five virtual machines that run Windows Server. Each virtual machine hosts a different web app. You plan to use an Azure application gateway to provide access to each web app by using a hostname of www.contoso.com and a different URL path for each web app, for example: https://www.contoso.com/app1.

You need to control the flow of traffic based on the URL path. What should you configure?

- a) HTTP settings
- b) listeners
- c) rules
- d) rewrites

Answer: c

Question: 5

You are configuring two network virtual appliances (NVAs) in an Azure virtual network. The NVAs will be used to inspect all the traffic within the virtual network. You need to provide high availability for the NVAs.

The solution must minimize administrative effort. What should you include in the solution?

- a) Azure Standard Load Balancer
- b) Azure Traffic Manager
- c) Azure Application Gateway
- d) Azure Front Door

Answer: a

Question: 6

Reference Scenario: [click here](#)

What should you implement to meet the virtual network requirements for the virtual machines that connect to Vnet4 and Vnet5?

- a) a private endpoint
- b) a virtual network peering
- c) a private link service
- d) a routing table
- e) a service endpoint

Answer: b

Question: 7

You need to provide connectivity to storage1. The solution must meet the PaaS networking requirements and the business requirements. What should you include in the solution?

- a) a service endpoint
- b) Azure Front Door
- c) a private endpoint
- d) Azure Traffic Manager

Answer: d

Question: 8

Reference Scenario: [click here](#)

You need to configure the default route in Vnet2 and Vnet3. The solution must meet the virtual networking requirements. What should you use to configure the default route?

- a) a user-defined route assigned to GatewaySubnet in Vnet2 and Vnet3
- b) a user-defined route assigned to GatewaySubnet in Vnet1
- c) BGP route exchange
- d) route filters

Answer: b

Question: 9

You have an Azure application gateway named AppGW1 that balances requests to a web app named App1.

You need to modify the server variables in the response header of App1. What should you configure on AppGW1?

- a) rules
- b) HTTP settings
- c) rewrites
- d) listeners

Answer: c

Question: 10

You have 10 Azure App Service instances. Each instance hosts the same web app. Each instance is in a different Azure region. You need to configure Azure Traffic Manager to direct users to the instance that has the lowest latency.

Which routing method should you use?

- a) performance
- b) geographic
- c) weighted
- d) priority

Answer: d

What Study Guide Works Best in Acing the Microsoft AZ-700 Designing and Implementing Microsoft Azure Networking Solutions Certification?

The AZ-700 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the Designing and Implementing Microsoft Azure Networking Solutions exam, getting in full touch of the [syllabus](#) is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your study schedule must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

Get Expert Advice from the Training:

If there is related Microsoft training, don't miss out the chance to join. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

Get Access to the PDF Sample Questions:

If your study material is in a [PDF format](#) or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

Avoid Dumps and utilize the Microsoft AZ-700 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, AZ-700 practice tests always stand out to be the better choice than dumps PDF.

Avail the Proven AZ-700 Practice Test for Success!!!

Do you want to pass the AZ-700 exam on your first attempt? Stop worrying; EduSum.com is here to provide you the best experience during your Designing and Implementing Microsoft Azure Networking Solutions preparation. Try out our free mock tests to get a glimpse of our quality study materials, and build your confidence with the premium [AZ-700 practice tests](#). Our expert-designed questions help you to improve performance and pass the exam on your first attempt.
