Who should take the **1Z0-1072-21 exam**? This is the first question that comes to a candidate's mind when preparing for the Cloud Infrastructure Architect Associate certification. The 1Z0-1072-21 certification is suitable for candidates who are keen to earn knowledge on the Oracle Cloud Infrastructure and grab their Oracle Cloud Infrastructure 2021 Certified Architect Associate. When it is about starting the preparation, most candidates get confused regarding the study materials and study approach. But 1Z0-1072-21 study guide PDF is here to solve the problem. 1Z0-1072-21 PDF combines some effective sample questions and offers valuable tips to pass the exam with ease.

Why Should You Earn the Oracle 1Z0-1072-21 Certification?

There are several reasons why one should grab the 1Z0-1072-21 certification.

- The Cloud Infrastructure Architect Associate certification proves to be one of the most recognized certifications.
- The certification badge proves the knowledge of the candidate regarding subject matters and makes his resume presentable to potential candidates.
- Thus earning the **Oracle Cloud Infrastructure 2021 Certified Architect Associate** is a powerful qualification for a prosperous career.

What Is the Oracle 1Z0-1072-21 Cloud Infrastructure Architect Associate Certification Exam Structure?

Exam Name	Oracle Cloud Infrastructure 2021 Architect Associate
Exam Code	1Z0-1072-21
Exam Price	**Free**
Duration	90 minutes
Number of Questions	60

Passing Score	65%
Format	Multiple Choice Questions (MCQ)
Recommended Training	**Oracle Cloud Infrastructure 2021 Certified Architect Associate**
Schedule Exam	**Pearson VUE**
Sample Questions	**Oracle Cloud Infrastructure 2021 Certified Architect Associate (OCA)**
Recommended Practice	**1Z0-1072-21 Online Practice Exam**

Enhance Knowledge with 1Z0-1072-21 Sample Questions:

Question: 1

You have a shared file system between two web servers by using file storage service (FSS) and you were tasked with creating a backup plan for this environment to protect the data placed in the shared file system.

What is the recommended approach to create this backup using FSS features?

    a) Implement a manual backup job to execute a snapshot of the shared file system.
    b) Implement a cron job to copy data from the shared file system to object storage.
    c) Use the rsync tool to send data from the shared file system to a block volume.
    d) Compress the data that is in the shared file system and copy it to a different folder on the boot volume.
    e) Use the rsync tool to send data from the shared file system to a boot volume.

Answer: a

Question: 2

Which two statements are true about boot volumes?

    a) You can delete the boot volume that is currently attached to an instance.
    b) You can detach a boot volume from a running instance.
    c) You can launch another instance by using an unused boot volume.
    d) You can create a backup of boot volumes.

Answer: c, d

Question: 3

You are a network architect of an application running on Oracle Cloud Infrastructure (OCI). Your security team has informed you about a security patch that needs to be applied immediately to one of the backend web servers.

What should you do to ensure that the OCI load balancer does not forward traffic to this backend server during maintenance?

a) Edit the security list associated with the subnet to avoid traffic connectivity to this backend server.
b) Create another OCI load balancer for the backend web servers, which are active and handling traffic.
c) Stop the load balancer for maintenance and restart the load balancer after the maintenance is finished.
d) Drain all existing connections to this backend server and mark the backend web server offline.

Answer: d

Question: 4

Which two statements are true about subnets within a VCN?

a) You can have multiple subnets in an Availability Domain for a given VCN.
b) Private and Public subnets cannot reside in the same Availability Domain for a given VCN.
c) Subnets can have their IP addresses overlap with other subnets in another network for a given VCN.
d) Instances obtain their private IP and the associated security list from their subnets.

Answer: a, d

Question: 5

What is the default backup location for database backup on database Cloud Service (DBCS)?

a) Object Storage on Oracle Cloud Infrastructure
b) ASM diskgroup
c) block volume
d) locally attached NVMe on Virtual Machine

Answer: a

Question: 6

A new employee has just started working for your company. You create an Oracle Cloud infrastructure user account for this employee, following which they are able to log in, but still cannot create any resources.

What should you do to resolve this?

a) Send the employee API Signing Keys to log in.
b) Delete the account and create another one.
c) Make sure that the employee is logging in to the Oracle Cloud Infrastructure account from your corporate network only.
d) Add the employee to a group with policies to grant access to relevant resources.

Answer: d

Question: 7

You have a compute instance with five 1TB block volumes attached to it and you need to create a backup of those volumes.

Which is the recommended method to ensure time-consistent backups of those volumes?

a) Group all five volumes in a volume group and create a backup of the volume group.
b) Clone each block volume individually.
c) Create a script with five sequential backup Oracle Cloud Infrastructure command line interface (CLI) commands.
d) Create a shell script to clone each volume individually.

Answer: a

Question: 8

Which two characteristics do you need to consider when choosing a method to migrate a database to Oracle Cloud Infrastructure?

a) on-premises connectivity using remote and local virtual cloud network (VCN) peering
b) on-premises database version and quantity of data, including indexes
c) on-premises host operating system platform and network bandwidth
d) on-premises database character set and application version

Answer: b, c

Question: 9

When terminating a compute instance, which statement is true?

a) The instance needs to be stopped first, and then terminated.
b) All block volumes attached to the instance are terminated.
c) Users can preserve the boot volume associated with the instance.
d) The boot volume is always deleted.

Answer: c

Question: 10

Which resource is required when connecting to your on-premise network from your Virtual Cloud Network (VCN) via IPSec VPN or FastConnect?

a) Internet Gateway (IGW)
b) Dynamic Routing Gateway (DRG)
c) local peering gateway
d) NAT

Answer: b

What Study Guide Works Best in Acing the Oracle 1Z0-1072-21 Cloud Infrastructure Architect Associate Certification?

The 1Z0-1072-21 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the Cloud Infrastructure Architect Associate exam, getting in full touch of the **syllabus** is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

Get Expert Advice from the Training:

Do not forget to join the Oracle 1Z0-1072-21 training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

Get Access to the PDF Sample Questions:

If your study material is in a **PDF format** or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

Avoid Dumps and Utilize the Oracle 1Z0-1072-21 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self-assessment method. Therefore, 1Z0-1072-21 practice tests always stand out to be the better choice than dumps PDF.

Avail the Proven 1Z0-1072-21 Practice Test for Success!!!

Do you want to pass the 1Z0-1072-21 exam on your first attempt? Stop worrying; we, DBExam.com are here to provide you the best experience during your Oracle Cloud Infrastructure 2021 Architect Associate preparation. Try out our free mock tests to get a glimpse of our quality study materials, and build your confidence with the premium **1Z0-1072-21 practice tests**. Our expert-designed questions help you to improve performance and pass the exam on your first attempt.
