Practice Exam	<a href="#">Microsoft SC-400 Certification Practice Exam</a>

## Enhance Knowledge with SC-400 Sample Questions:

### Question: 1

A compliance administrator recently created several data loss prevention (DLP) policies. After the policies are created, you receive a higher than expected volume of DLP alerts.

You need to identify which rules are generating the alerts. Which DLP report should you use?

- a) Third-party DLP policy matches
- b) DLP policy matches
- c) DLP incidents
- d) False positive and override

**Answer: b**

**Question: 2**

You are creating a custom trainable classifier to identify organizational product codes referenced in Microsoft 365 content. You identify 300 files to use as seed content.

Where should you store the seed content?

- a) a Microsoft SharePoint Online folder
- b) a Microsoft OneDrive for Business folder
- c) an Azure file share
- d) Microsoft Exchange Online shared mailbox

**Answer: a**

**Question: 3**

Your company has a Microsoft 365 tenant that uses a domain named contoso.com. You are implementing data loss prevention (DLP). The company's default browser is Microsoft Edge.

During a recent audit, you discover that some users use Firefox and Google Chrome browsers to upload files labeled as Confidential to a third-party Microsoft SharePoint Online site that has a URL of <https://m365x076709.sharepoint.com>.

Users are blocked from uploading the confidential files to the site from Microsoft Edge. You need to ensure that the users cannot upload files labeled as Confidential from Firefox and Google Chrome to any cloud services.

Which two actions should you perform?

Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

(Choose two.)

- a) From the Microsoft 365 Endpoint data loss prevention (Endpoint) DLP settings, add [m365x076709.sharepoint.com](https://m365x076709.sharepoint.com) as a blocked service domain.
- b) Create a DLP policy that applies to the Devices location.
- c) From the Microsoft 365 Endpoint data loss prevention (Endpoint DLP) settings, add Firefox and Google Chrome to the unallowed browsers list.
- d) From the Microsoft 365 compliance center, onboard the devices.
- e) From the Microsoft 365 Endpoint data loss prevention (Endpoint) DLP settings, add contoso.com as an allowed service domain.

**Answer: c, d**

**Question: 4**

You create a custom sensitive info type that uses Exact Data Match (EDM). You plan to periodically update and upload the data used for EDM.

What is the maximum frequency with which the data can be uploaded?

- a) twice per week
- b) twice per day
- c) once every six hours
- d) once every 48 hours
- e) twice per hour

**Answer: b**

**Question: 5**

You need to be alerted when users share sensitive documents from Microsoft One Drive to any users outside your company. What should you do?

- a) From the Exchange admin center, create a data loss prevention (DLP) policy.
- b) From the Cloud App Security portal, create a file policy.
- c) From the Microsoft 365 compliance center, create an insider risk policy.
- d) From the Azure portal, create an Azure Active Directory (Azure AD) Identity Protection policy.

**Answer: b**

**Question: 6**

You have a Microsoft 365 tenant. You create the following:

- A sensitivity label
- An auto-labeling policy

You need to ensure that the sensitivity label is applied to all the data discovered by the auto-labeling policy. What should you do first?

- a) Enable insider risk management.
- b) Create a trainable classifier.
- c) Run the policy in simulation mode.
- d) Run the Enable-TransportRule cmdlet.

**Answer: c**

**Question: 7**

Your company has a Microsoft 365 tenant. The company performs annual employee assessments. The assessment results are recorded in a document named AssessmentTemplate.docx that is created by using a Microsoft Word template. Copies of the employee assessments are sent to employees and their managers.

The assessment copies are stored in mailboxes, Microsoft SharePoint Online sites, and OneDrive for Business folders. A copy of each assessment is also stored in a SharePoint Online folder named Assessments.

You need to create a data loss prevention (DLP) policy that prevents the employee assessments from being emailed to external users. You will use a document fingerprint to identify the assessment documents. The solution must minimize effort.

What should you include in the solution?

- a) Create a fingerprint of AssessmentTemplate.docx.
- b) Create a sensitive info type that uses Exact Data Match (EDM).
- c) Import 100 sample documents from the Assessments folder to a seed folder.
- d) Create a fingerprint of 100 sample documents in the Assessments folder.

**Answer: a**

**Question: 8**

You have a data loss prevention (DLP) policy that applies to the Devices location. The policy protects documents that contain United States passport numbers. Users report that they cannot upload documents to a travel management website because of the policy.

You need to ensure that the users can upload the documents to the travel management website. The solution must prevent the protected content from being uploaded to other locations.

Which Microsoft 365 Endpoint data loss prevention (Endpoint DLP) setting should you configure?

- a) Unallowed browsers
- b) File path exclusions
- c) Unallowed apps
- d) Service domains

**Answer: d**

**Question: 9**

Reference Scenario: [click here](#)

You are evaluating the technical requirements for the DLP reports. Which user can currently view the DLP reports?

- a) Admin4
- b) Admin1
- c) Admin5
- d) Admin2
- e) Admin3

**Answer: e**

**Question: 10**

Each product group at your company must show a distinct product logo in encrypted emails instead of the standard Microsoft Office 365 logo.

What should you do to create the branding templates?

- a) Create a Transport rule.
- b) Create an RMS template.
- c) Run the Set-IRMConfiguration cmdlet.
- d) Run the New-OMEConfiguration cmdlet.

**Answer: d**

## What Study Guide Works Best in Acing the Microsoft SC-400 Information Protection Administrator Certification?

The SC-400 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

## Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the Information Protection Administrator exam, getting in full touch of the [syllabus](#) is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

## Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your study schedule must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

## Get Expert Advice from the Training:

If there is related Microsoft training, don't miss out the chance to join. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

## Get Access to the PDF Sample Questions:

If your study material is in a [PDF format](#) or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

## Avoid Dumps and utilize the Microsoft SC-400 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, SC-400 practice tests always stand out to be the better choice than dumps PDF.

### Avail the Proven SC-400 Practice Test for Success!!!

Do you want to pass the SC-400 exam on your first attempt? Stop worrying; EduSum.com is here to provide you the best experience during your Microsoft Information Protection Administrator preparation. Try out our free mock tests to get a glimpse of our quality study materials, and build your confidence with the premium [SC-400 practice tests](#). Our expert-designed questions help you to improve performance and pass the exam on your first attempt.
