Who should take the [1Z0-1067-22 exam](#)? This is the first question that comes to a candidate's mind when preparing for the Cloud Infrastructure Cloud Operations Professional certification. The 1Z0-1067-22 certification is suitable for candidates who are keen to earn knowledge on the Oracle Cloud Infrastructure and grab their Oracle Cloud Infrastructure 2022 Certified Cloud Operations Professional. When it is about starting the preparation, most candidates get confused regarding the study materials and study approach. But 1Z0-1067-22 study guide PDF is here to solve the problem. 1Z0-1067-22 PDF combines some effective sample questions and offers valuable tips to pass the exam with ease.

Why Should You Earn the Oracle 1Z0-1067-22 Certification?

There are several reasons why one should grab the 1Z0-1067-22 certification.

- The Cloud Infrastructure Cloud Operations Professional certification proves to be one of the most recognized certifications.
- The certification badge proves the knowledge of the candidate regarding subject matters and makes his resume presentable to potential candidates.
- Thus earning the [Oracle Cloud Infrastructure 2022 Certified Cloud Operations Professional](#) is a powerful qualification for a prosperous career.

What Is the Oracle 1Z0-1067-22 Cloud Infrastructure Cloud Operations Professional Certification Exam Structure?

Exam Name	Oracle Cloud Infrastructure 2022 Cloud Operations Professional
Exam Code	1Z0-1067-22
Exam Price	USD \$245 (Pricing may vary by country or by localized currency)
Duration	90 minutes
Number of Questions	55
Passing Score	65%
Format	Multiple Choice Questions (MCQ)
Recommended Training	Oracle Cloud Infrastructure Learning subscription Oracle Cloud Infrastructure 2022 Certified Cloud Operations Professional
Schedule Exam	Pearson VUE
Sample Questions	Oracle Cloud Infrastructure 2022 Certified Cloud Operations Professional (OCP)
Recommended Practice	1Z0-1067-22 Online Practice Exam

Enhance Knowledge with 1Z0-1067-22 Sample Questions:

Question: 1

Which is an important consideration when choosing an Oracle Cloud Infrastructure region?

- a) Choose the region that offers single availability domain for cost saving.
- b) Choose the region that is in close proximity to end users for best performance.
- c) Choose the region that offers the lowest cost.
- d) Choose the region that is far away from application to eliminate single point of failure.

Answer: b

Question: 2

A developer has created a file system in Oracle Cloud Infrastructure (OCI) File Storage service. She launches an Oracle Linux compute instance and successfully mounts the file system from the instance.

She then tries writing to the file system from the compute instance using the following command: `touch /mnt/yourmountpoint/helloworld` But gets an error message: `touch: cannot touch /mnt/yourmountpoint/helloworld: Permission denied`

Which is a reason for this error?

(Choose the best answer.)

- a) User is not part of any OCI Identity and Access Management group with write permissions to File Storage service.
- b) touch command is not available in Oracle Linux by default.
- c) User is connecting as the default Oracle Linux user `opc` instead of root user.
- d) Service limits or quota for file system writes have been breached.

Answer: a

Question: 3

One of the compute instances that you have deployed on Oracle Cloud Infrastructure (OCI) is malfunctioning. You have created a console connection to remotely troubleshoot it.

Which two statements about console connections are TRUE?

(Choose two.)

- a) It is not possible to use VNC console connections to connect to Bare Metal Instances.
- b) VNC console connection uses SSH port forwarding to create a secure connection from your local system to the VNC server attached to your instance's console.
- c) It is not possible to connect to the serial console to an instance running Microsoft Windows, however VNC console connection can be used.
- d) For security purpose, the console connection will not let you edit system configuration files.
- e) If you do not disconnect from the session, your serial console connection will automatically be terminated after 24 hours.

Answer: b, e

Question: 4

Multiple teams are sharing a tenancy in Oracle Cloud Infrastructure (OCI). You are asked to figure out an appropriate method to manage OCI costs.

Which is NOT a valid technique to accurately attribute costs to resources used by each team?

(Choose the best answer.)

- a) Create a Cost-Tracking tag. Apply this tag to all resources with team information. Use the OCI cost analysis tools to filter costs by tags.
- b) Create separate compartment for each team. Use the OCI cost analysis tools to filter costs by compartment.
- c) Create an Identity and Access Management (IAM) group for each team. Create an OCI budget for each group to track spending.
- d) Define and use tags for resources used by each team. Analyze usage data from the OCI Usage Report which has detailed information about resources and tags.

Answer: c

Question: 5

Security Testing Policy describes when and how you may conduct certain types of security testing of Oracle Cloud Services, including vulnerability and penetration tests, as well as tests involving data scraping tools.

What does Oracle allow as part of this testing?

(Choose the best answer.)

- a) Customers are allowed to use their own testing and monitoring tools.
- b) Customers can simulate DoS attack scenarios as long as it's restricted to the customer's own environment.
- c) Customers can validate that their network resources are isolated from other customer resources.
- d) Customers are allowed to test Oracle Cloud Infrastructure (OCI) hardware related to resources in their tenancy.

Answer: d

Question: 6

Which two statements about the Oracle Cloud Infrastructure (OCI) Command Line Interface (CLI) are TRUE?

(Choose two.)

- a) You can run CLI commands from inside OCI Regions only.
- b) You can filter CLI output using the JMESPath query option for JSON.
- c) The CLI provides an automatic way to connect with instances provisioned on OCI.
- d) The CLI allows you to use the Python language to interact with OCI APIs.
- e) The CLI provides the same core functionality as the Console, plus additional commands.

Answer: b, e

Question: 7

Which option contains the essential components of the Oracle Cloud Infrastructure Notifications service?

(Choose the best answer.)

- a) An ALARM with a name unique across the tenancy, a SUBSCRIPTION, and a METRIC with the measurement of interest.
- b) A TOPIC with a name unique across the tenancy, a SUBSCRIPTION, and a MESSAGE where content is published.
- c) A TOPIC with a name unique across the compartment, a SUBSCRIPTION, and a MESSAGE where content is published.
- d) An ALARM with a name unique across the compartment, a SUBSCRIPTION, and a METRIC with the measurement of interest.

Answer: b

Question: 8

Your customer is running a set of compute instances inside a private subnet to manage their workloads on Oracle Cloud Infrastructure (OCI) tenancy.

You have set up auto scaling feature to provide consistent performance to their end users during period of high demand.

Which step should be met for auto scaling to work?

(Choose the best answer.)

- a) OS Management Service agent (osms) must be installed on the instances.
- b) Audit logs for the instances should be enabled.
- c) Service gateway should be setup to allow instances to send metrics to monitoring service.
- d) Monitoring for the instances should not be enabled.

Answer: c

Question: 9

What is a key benefit of using Oracle Cloud Infrastructure Resource Manager for your Terraform provisioning and management activities?

(Choose the best answer.)

- a) You can use Resource Manager to apply patches to all existing Oracle Linux interfaces in a specified compartment.
- b) You can use Resource Manager to identify and maintain an inventory of all Compute and Database instances across your tenancy.
- c) Resource Manager has administrative privileges by design. Even if your IAM user does not have access, you can leverage Resource Manager to provision new resources to any compartment in the Tenancy.
- d) Resource Manager manages the Terraform state file for your infrastructure and locks the file so that only one job at a time can run on a given stack.

Answer: d

Question: 10

The boot volume on your Oracle Linux instance has run out of space. Your application has crashed due to a lack of swap space, forcing you to increase the size of the boot volume.

Which step should NOT be included in the process used to solve the issue?

(Choose the best answer.)

- a) Reattach the boot volume and restart the instance.
- b) Stop the instance and detach the boot volume.
- c) Resize the boot volume by specifying a larger value than the boot volume current size.
- d) Attach the resized boot volume to a second instance as a data volume; extend the partition and grow the file system in the resized boot volume.
- e) Create a RAID 0 configuration to extend the boot volume file system onto another block volume.

Answer: e

What Study Guide Works Best in Acing the Oracle 1Z0-1067-22 Cloud Infrastructure Cloud Operations Professional Certification?

The 1Z0-1067-22 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the Cloud Infrastructure Cloud Operations Professional exam, getting in full touch of the [syllabus](#) is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

Get Expert Advice from the Training:

Do not forget to join the Oracle 1Z0-1067-22 training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

Get Access to the PDF Sample Questions:

If your study material is in a [PDF format](#) or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

Avoid Dumps and Utilize the Oracle 1Z0-1067-22 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self-assessment method. Therefore, 1Z0-1067-22 practice tests always stand out to be the better choice than dumps PDF.

Avail the Proven 1Z0-1067-22 Practice Test for Success!!!

Do you want to pass the 1Z0-1067-22 exam on your first attempt? Stop worrying; we, DBExam.com are here to provide you the best experience during your Oracle Cloud Infrastructure 2022 Cloud Operations Professional preparation. Try out our free mock tests to get a glimpse of our quality study materials, and build your confidence with the premium [1Z0-1067-22 practice tests](#). Our expert-designed questions help you to improve performance and pass the exam on your first attempt.
