Enhance Knowledge with C2010-653 Sample Questions:

Question: 1

A customer has complained that an error message is showing up after they close and reopen the form. It is discovered that a synchronous workflow controls the error message process. What should be changed so that the error message displays while the form is open?

- a) Change the synchronous workflow to use temporary data.
- b) Change the synchronous workflow to trigger from a state action.
- c) Change the synchronous workflow to use permanent data.
- d) Change the synchronous workflow to an asynchronous workflow.

Answer: a

Question: 2

A text field on a form cannot display all of the characters in its value in a single line. How can the visible portion of the field be enlarged on the form?

a) Adjust the size value for this field in Data Modeler
b) Adjust the minimum size setting for this field in Form Builder
c) Adjust the result column setting for this field in Data Modeler
d) Adjust the column and/or row span settings for this field in Form Builder

Answer: d

Question: 3

A change is made in a state transition configuration in Data Modeler but it has not carried over correctly at runtime. Why?

a) The developer did not publish the form of the base business object (BO).
b) The developer did not make the change in the base BO in Data Modeler.
c) The developer did not import the state transition in Data Modeler.
d) The developer did not click Apply in the state transition properties.

Answer: d

Question: 4

A developer has been tasked to create a method to push a record from the null state to the triActive state without having the action available on a form. What should be done to implement this design?

a) Create a state transition from null to tri Draft, another from tri Draft to triActive in Form Builder, and keep Secondary Action checked in the state transition properties.
b) Create a state transition from null to triActive in Form Builder and keep Visible unchecked in the state transition properties.
c) Create a state transition from null to triActive in Data Modeler and keep Default Display unchecked in the state transition properties.
d) Create a state transition from null to tri Draft, another from tri Draft to triActive in Data Modeler, and keep Secondary Action checked in the state transition properties.

Answer: c

Question: 5

The requirement for a state transition is to automatically close the record window when the transition occurs at runtime. How can this functionality be implemented?

a) Configure the Close Window setting in the properties for this action in Form Builder
b) Configure the Close Window setting for the target state properties in Form Builder
c) Configure the Close Window setting in the sub action properties
d) Configure the Close Window setting in the state transition properties

Answer: d

Question: 6

Which field type can be used as a Locator field?

a) Date
b) Number
c) Text
d) Classification

Answer: c

Question: 7

Query sections are preferred over multi-record smart sections except for what instance?

a) When the developer wants to sort the records by clicking on a column header.
b) When the developer wants the records displayed in a vertical format.
c) When the developer wants the user to be able to filter the data at runtime.
d) When there are a lot of records so the query section performance suffers.

Answer: b

Question: 8

Which workflow type gets executed by an association of two objects?

a) synchronous workflow using temporary data
b) asynchronous workflow using temporary data
c) synchronous workflow using permanent data
d) asynchronous workflow using permanent data

Answer: d

Question: 9

a) Stop and start any agent in the Agent Manager
b) Click Roll All Logs in the System Manager
c) Click the Roll Log Image/Link next to the appropriate category in Error Logging
d) Restart the system

Answer: c

Question: 10

What type of workflow can be called from an onChange event?

a) Synchronous workflow
b) Scheduled event workflow
c) Asynchronous workflow
d) Subflow workflow

Answer: a

What Study Guide Works Best in acing the IBM C2010-653 Fundamentals of IBM TRIRIGA Application Platform Application Development Certification?

The C2010-653 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the Fundamentals of IBM TRIRIGA Application Platform Application Development exam, getting in full touch of the **syllabus** is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

Get Expert Advice from the Training:

Do not forget to join the IBM C2010-653 training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

Get Access to the PDF Sample Questions:

If your study material is in a **PDF format** or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

Avoid Dumps and utilize the IBM C2010-653 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, C2010-653 practice tests always stand out to be the better choice than dumps PDF.

Avail the Proven C2010-653 Practice Test for Success!!!

Do you want to pass the C2010-653 exam on your first attempt? Stop worrying; we, EduSum.com are here to provide you the best experience during your Fundamentals of IBM TRIRIGA Application Platform V3.2.1 Application Development preparation. Try out our free mock tests to get a glimpse of our quality study materials, and build your confidence with the premium **C2010-653 practice tests**. Our expert-designed questions help you to improve performance and pass the exam on your first attempt.
