Enhance Knowledge with CTAL-TM Sample Questions:

Question: 1

Your management has decided to change to a different test and defect management tool that will be used for all new projects. No one in your team has used this tool before. The vendor will help with configuring the tool.

What effect should the new tool adoption have on your test estimate for the next new project?

    a) No change because the vendor will handle the configuration effort
    b) No change because the developers will not be affected by the tool change
    c) The estimate should be increased to account for time to learn the new too
    d) The estimate should be decreased because the new tool will introduce efficiencies in the process

Answer: c

Question: 2

In an Agile software development lifecycle when is work completed for an iteration?

a) As early as possible in the build phase
b) Before the next iteration begins
c) Prior to moving from the integration test level to the system test level
d) At the conclusion of iteration zero

Answer: b

Question: 3

When working with an organization that has geographically distributed testing and development teams, what is an effective way to improve communication?

a) Encourage the use of informal communication such as hallway chats
b) Use team building exercises with all team members to help improve the relationships
c) Employ good tools with clear workflows to track project tasks including defects
d) Plan to have significant overlap in the activities where both teams work on the same tasks and then compare the results

Answer: c

Question: 4

The developers are willing to build a tool that will provide traceability between the source code modules and the test cases that test those modules.

What management concerns should you have with this development effort?

a) Long term maintenance may not be planned, leaving you with an unsupported tool
b) The scope of the project is too large and the tool will be too generic to be useful
c) There are no requirements for this effort so you will be at the mercy of what the developers decide to implement
d) It is unlikely that the ROI will be achieved

Answer: a

Question: 5

What is the primary reason for tracking root cause information?

a) To identify the developers with poor development tendencies
b) To target testing to areas where the highest number of defects are found
c) To improve the testing techniques used to detect defects
d) To provide information for process improvement

Answer: d

Question: 6

Which of the following is a true statement regarding the risk rating for a test object?

- a) The overall rating remains the same throughout the testing
- b) The likelihood tends to increase when high priority problems are found
- c) The impact tends to increase as more issues are found
- d) The likelihood and impact may vary based on what is discovered during testing

Answer: d

Question: 7

You have been closely tracking the Defect Detection Effectiveness (DDE) for the last release. You are showing a DDE of 95%, which has achieved the goal set by the organization. This is an example of what type of metric?

- a) Project metric
- b) Process metric
- c) Product metric
- d) People metric

Answer: b

Question: 8

You have just completed summarizing all the test results for a release and have created a document showing the workarounds for each open defect. You have given this information to the team who will be supporting the product in production.

What type of activity have you just completed?

- a) Test analysis
- b) Test support
- c) Test execution
- d) Test closure

Answer: d

Question: 9

Your testers want to have a weekly "best bug" contest within the team. Should you implement this?

- a) Yes, it will help to motivate the team by bringing them together with a common understanding of the problems found in the software by having a friendly contest
- b) Yes, it will help them to become better testers by showing the defects that have been missed by others
- c) No, defects are negative and finding them should not be encouraged in a testing team
- d) No, it is likely to discourage the junior testers who can't find as many defects as the senior testers

Answer: a

Question: 10

As a Test Manager which of the following is a key component to motivating the test team?

a) Give fair and honest appraisals of mistakes
b) Recognize all team members regardless of contribution
c) Base the amount of praise on the importance of the project
d) Provide positive recognition, avoiding negative feedback if possible

Answer: a

What Study Guide Works Best in Acing the ISTQB CTAL-TM Test Manager Certification?

The CTAL-TM study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the Test Manager exam, getting in full touch of the **syllabus** is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

Get Expert Advice from the Training:

Do not forget to join the ISTQB CTAL-TM training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

Get Access to the PDF Sample Questions:

If your study material is in a **PDF format** or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

Avoid Dumps and Utilize the ISTQB CTAL-TM Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, CTAL-TM practice tests always stand out to be the better choice than dumps PDF.

Avail the Proven CTAL-TM Practice Test for Success!!!
