## Enhance Knowledge with 1Z0-580 Sample Questions:

### Question: 1

Which command can be used to determine which apache web server packages are installed?

- a) pkg list apache
- b) pkg list \*apache\*
- c) pkg list installed apache
- d) pkg list all apache
- e) pkg list all web installed

**Answer: a**

### Question: 2

What are the three properties of a business critical cloud infrastructure?

(Choose three)

- a) service isolation
- b) flexible, virtual application instances
- c) dedicated, single purpose file servers
- d) easy, intuitive provisioning, chargeback, and capacity planning
- e) rigid, inflexible network design

**Answer: a, b, d**

**Question: 3**

You are working on a system that appears to be hanging during the boot process. Which would be the course of action for determining which step in the boot process is causing the issue?

- a) Boot the system into single user mode, run `ps -ef` to determine processes that are not running.
- b) Boot the system into the "none" milestone, enable all services, then run `svcs -a` to determine the state of your services, as well as check for error messages in `/var/svc/log`.
- c) Boot the system, disable all services using the "svcs disable all" command, reboot and bring up each service individually.
- d) Interrupt the boot process before services are started with Stop-A or.
- e) Perform an Interactive boot, and disable services as they request startup.

**Answer: b**

**Question: 4**

You have just completed a default Oracle Solaris 11 installation of a new server system. While testing network connectivity from your desktop to the server, you find that you are not able to communicate with the "sendmail" service from your desktop. Why is this?

- a) By default, the "sendmail" software is not installed.
- b) By default, "sendmail" is not enabled on the system.
- c) By default, "sendmail" access is blocked by TCP Wrappers.
- d) By default, "sendmail" responds to local requests only.
- e) By default, "sendmail" is running on its encrypted port.

**Answer: d**

**Question: 5**

When conducting an automated installation, the name of the resulting root pool is "rpool1." Which is the direct cause of this?

- a) The system already has a root pool named "rpool".
- b) The manifest declares the name of the root pool to use.
- c) "pool1" is the preexisting name of the root pool.
- d) "rpool" is a reserved pool name that can only be used for factory-based installations.
- e) Of the two disks present for mirroring, the first is named "rpool" and the second is named "pool1".

**Answer: a**

**Question: 6**

Which two options do you absolutely need to have in place in order to successfully customize the network installation of an Oracle Solaris 11 x86 system?

(Choose two)

- a) two Automated Installer manifests, one for x86 systems and another one for SPARC systems
- b) an SMF system configuration profile
- c) an x86 system running Automated Installer service
- d) either a SPARC or an x86 system running Automated Installer service
- e) an Oracle Solaris 11 IPS repository hosted in your own data center

**Answer: b, d**

**Question: 7**

A developer wants to use DTrace in a zone to examine the kernel. What are his options?

- a) Modify the zone so that he can use DTrace to examine kernel data structures.
- b) All that's required is to assume the "root" role.
- c) By using `dtrace_proc` and `dtrace_user` privileges he can examine his own code, but not the kernel.
- d) By adding `ipc_dac_read` and `ipc_dac_write` privileges to the zone.
- e) Change the zone's file-mac-profile from strict to none to enable the use of DTrace within the zone.

**Answer: c**

**Question: 8**

The command "`beadm create -a solaris-test`" will \_\_\_\_\_.

- a) create and automatically boot the solaris-test boot environment
- b) create and activate the solaris-test boot environment but not reboot
- c) create an archive of the solaris-test boot environment
- d) will not create a new boot environment without further information
- e) will only activate a previously defined boot environment named solaris-test

**Answer: b**

**Question: 9**

The Oracle Solaris Image Packaging System (IPS) cannot be used to \_\_\_\_\_.

- a) manage local software repositories
- b) create new software repositories
- c) create new Oracle Solaris 11 boot environments
- d) restore an installed file to its original content
- e) manage permissions of installed software

**Answer: e**

**Question: 10**

Which two actions are used to permanently configure a new interface?

(Choose two)

- a) `dladm set-linkprop mtu=1500 net2`
- b) `ipadm create-addr T static a 10.2.3.5/24 net2/v4static`
- c) `ipadm create-addr a local=2ff0::f3ad/64 T static t net2/v6dhcp`
- d) `ipadm create-ip net2`

**Answer: b, d**

## What Study Guide Works Best in Acing the Oracle 1Z0-580 Solaris Installation and Configuration Essentials Certification?

The 1Z0-580 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

### Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the Solaris Installation and Configuration Essentials exam, getting in full touch of the [syllabus](#) is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

## Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

## Get Expert Advice from the Training:

Do not forget to join the Oracle 1Z0-580 training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

## Get Access to the PDF Sample Questions:

If your study material is in a [PDF format](#) or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

## Avoid Dumps and Utilize the Oracle 1Z0-580 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, 1Z0-580 practice tests always stand out to be the better choice than dumps PDF.
