Who should take the [QSDA2022 exam](#)? This is the first question that comes to a candidate's mind when preparing for the Qlik Sense Data Architect certification. The QSDA2022 certification is suitable for candidates who are keen to earn knowledge on the Qlik Sense and grab their Qlik Sense Data Architect. When it is about starting the preparation, most candidates get confused regarding the study materials and study approach. But QSDA2022 study guide PDF is here to solve the problem. QSDA2022 PDF combines some effective sample questions and offers valuable tips to pass the exam with ease.

Why Should You Earn the Qlik QSDA2022 Certification?

There are several reasons why one should grab the QSDA2022 certification.

- The Qlik Sense Data Architect certification proves to be one of the most recognized certifications.
- The certification badge proves the knowledge of the candidate regarding subject matters and makes his resume presentable to potential candidates.
- Thus earning the [Qlik Sense Data Architect](#) is a powerful qualification for a prosperous career.

What Is the QSDA2022 Qlik Sense Data Architect Certification Exam Structure?

Exam Name	Qlik Sense Data Architect
Exam Code	QSDA2022
Exam Duration	120 minutes
Exam Questions	50
Passing Score	60%
Exam Price	\$250 (USD)
Books	Data Architect Data Modeling for Qlik Sense
Exam Registration	Pearson VUE
Sample Questions	Qlik Sense Data Architect Certification Sample Question
Practice Exam	Qlik Sense Data Architect Certification Practice Exam

Enhance Knowledge with QSDA2022 Sample Questions:

Question: 1

User A is the owner of a Qlik Sense app that uses section access. User A is NOT included in the Section. Access table of the app. The app is published in the Sales stream. A security rule grants User A access to the Sales stream.

User A accesses the Sales stream in the hub to open the app. What is the result?

- a) User A sees the app in the Sales stream, but is unable to open it and sees an "Internal Error" message
- b) User A does NOT see the app in the Sales stream
- c) User A sees the app in the Sales stream and is able to open the app
- d) User A sees the app in the Sales stream, but is unable to open it and sees an "Access Denied" message

Answer: d

Question: 2

A data architect must load data from an online source using the REST connector. The REST endpoint must be called several times and pass different values into a query parameter each time to retrieve all required data.

The URL and the other query parameters do NOT change between calls. The parameter values are stored in an existing table in the data model. These values have been previously loaded and may change during each data reload.

A REST connector has already been set up with the appropriate URL and static query parameters.

Which steps should the data architect use to retrieve all data?

- a) 1. Select the Add missing query parameters checkbox in the REST connector
- 2. Use a FOR loop, No Of Rows () and Peek() functions
- 3. Use WITH CONNECTION to add the relevant query parameter
- b) 1. Amend the REST connector and add the new query parameter with a value of *
- 2. Ensure the association field matches the previous table
- 3. Perform a LEFT KEEP to ensure only the needed results are loaded
- c) 1. Create a new REST connection for each query value
- 2. Use a FOR loop, No Of Rows () and Peek () functions
- 3. Call the appropriate REST connection dynamically for each loop iteration
- d) 1. Copy the URL from the REST connector and create a Web File connector
- 2. Use a FOR loop, No Of Rows () and Peek () functions
- 3. Amend the Web File connector URL in each iteration

Answer: a

Question: 3

A data architect notices an issue with a measure in the master items. Item '5126' is used only for testing and must be excluded from the total.

Which is the correct expression to meet this requirement?

- a) =Sum({\$<ItemNumber -= {5126}>}[Total Value])
- b) =Sum({\$-ItemNumber = {" 5126"}>}[Total Value])
- c) =Sum({\$<ItemNumber = {5126}>}[Total Value])
- d) =Sum({\$<ItemNumber != {"5126"}>}[Total Value])

Answer: a

Question: 4

A data architect makes changes to a data model in an app that has 123 million rows of data. Each time the data is loaded, it takes 30 minutes. The data architect must limit the time required to validate changes to the data model.

What should the data architect do?

- a) Open the debugger, set number of lines to 100, and click Run
- b) Insert a breakpoint at the LOAD command, open the debugger, and 0 step through the code
- c) Open the debugger, check Limited Load, and click Run
- d) Create a smaller data set in the database to load into the app

Answer: c

Question: 5

A data architect creates a new Finance app in Qlik Sense Desktop and is ready to publish it so that Finance users and Executives are able to access it.

The app contains a single data connection called PRODDB. The Qlik Sense Enterprise hub has several streams configured and secured: Sales, HR, Finance and Executive, IT, and Everyone.

Which instructions should the data architect provide to the system administrator to make sure that the app can be reloaded daily and accessed by the right users?

- a) 1. Import the new Finance app and publish to the 'Finance and Executive' stream
2. Create the data connection called PRODDB
- b) 1. Publish the app QVF file to the 'Finance and Executive' stream
2. Publish the data connection, PRODDB, to the 'Finance and Executive' stream
- c) 1. Import the new Finance app and publish to the 'Finance' stream
2. Import the data connection called PRODDB
- d) 1. Copy the app QVF file to the 'Finance and Executive' directory
2. Create a new data connection called PRODDB

Answer: b

Question: 6

The Human Resources department sends the data architect an Employees table with newly hired employees in a monthly spreadsheet.

The spreadsheet always has the same data structure and fields, but sometimes includes duplicates of previously hired employees. The data architect must load the Employees table into the data model each month, without duplication of the records.

Which action should the data architect take to meet this requirement?

- a) Load the first Employees table and perform a full OUTER JOIN with the latest Employees table to the original.
- b) Load the first Employees table, updating the next month's Employees table using WHERE NOT EXISTS clause
- c) Load the Employees table by concatenating the latest Employees table to the previous month's table.
- d) Load the Employees table each month and LEFT JOIN the current table to the previous month's table.

Answer: b

Question: 7

A data architect is building an app for a large healthcare organization, and is given these requirements:

- Load data from SQL Server for eight hospitals
- Load data from Oracle for six hospitals
- All data must be refreshed once per day
- Users must see details of each transaction
- Most users should only see data for their hospital
- Some users will have access to all data

Which approach should the data architect take?

- a) Create a task that runs daily to load data from each system
Use an incremental load strategy to add the daily data
Create security rules in the QMC
- b) Create a task that runs daily to load data from each system
Use an incremental load strategy to add the daily data
Use section access
- c) Build a data warehouse from all sources
Create a task that runs daily to load data from each system
Create security rules in the QMC
- d) Create a task that runs daily to load data from each system
Use a binary load process to load the data
Use Section access

Answer: b

Question: 8

A data architect is using the Qlik View converter to load a Qlik View document into Qlik Sense. The convertor does not load the Qlik View document correctly.

Which two reasons will cause the convertor to fail?

(Select two)

- a) Show/hide conditions are used in the Qlik View document
- b) The Qlik View document contains hidden scripts
- c) The Qlik View document has section access applied
- d) Variables have been used in the Qlik View load script
- e) The Qlik View document contains charts not found in Qlik Sense

Answer: b, c

Question: 9

An analyst needs to review sales information for the previous year-to-date and the current year. The data in the sales app is refreshed daily.

The Date field contains both past and future dates. The data architect decides to create two flags as master items.

Which two functions will meet these requirements?

(Select two)

- a) YearToDate(Date)
- b) SetDateYear(Date,1)
- c) InYear(Date,Today,0,0)
- d) YearToDate(Date,-1)
- e) InYearToDate(Date-365,Today())

Answer: a, d

Question: 10

A sales team has access to a Sales Performance app. The app contains the Sales Goal metric, which is a complex calculation used in multiple visualizations. Individual users must drag and drop the Sales Goal metric into their own analyses.

What should a data architect create to store the formula to calculate the Sales Goal?

- a) A master item in the assets panel
- b) A variable in the assets panel
- c) A variable in the data load editor
- d) A master item in the data load editor

Answer: a

What Study Guide Works Best in Acing the QSDA2022 Qlik Sense Data Architect Certification?

The QSDA2022 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the Qlik Sense Data Architect exam, getting in full touch of the [syllabus](#) is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

Get Expert Advice from the Training:

Do not forget to join the Qlik QSDA2022 training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

Get Access to the PDF Sample Questions:

If your study material is in a [PDF format](#) or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

Avoid Dumps and Utilize the Qlik QSDA2022 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, QSDA2022 practice tests always stand out to be the better choice than dumps PDF.

Avail the Proven QSDA2022 Practice Test for Success!!!

Do you want to pass the QSDA2022 exam on your first attempt? Stop worrying; we, AnalyticsExam.com are here to provide you the best experience during your Qlik Sense Data Architect preparation. Try out our free mock tests to get a glimpse of our quality study materials, and build your confidence with the premium [QSDA2022 practice tests](#). Our expert-designed questions help you to improve performance and pass the exam on your first attempt.
