# Enhance Knowledge with CTFL-AT Sample Questions:

## Question: 1

Which of the following statements best reflects one of the values of the Agile Manifesto?

- a) Working software allows the customer to provide rapid feedback to the developer.
- b) Developers should use unit testing tools to support the testing process.
- c) Business representatives should provide a backlog of user stories and their estimates to the team.
- d) Adopting plans to change adds no real value to an agile project.

**Answer: a**

## Question: 2

Which of the following demonstrates effective use of the testing quadrants?

- a) When communicating test ideas, the tester can refer to the matching test quadrant, so that the rest of the team will better understand the purpose of the test.
- b) The tester can use the types of tests described in the testing quadrants as a coverage metric, the more tests covered from each quadrant, the higher the test coverage.
- c) The team should pick a number of tests expected from each quadrant, and the tester should design and execute those tests to ensure all levels and types of tests have been executed
- d) The tester can use the testing quadrants during risk analysis; with the lower level quadrants representing lower risk to customer.

**Answer: a**

## Question: 3

Given the following user story: "An online application charges customers to ship purchased items, based on the following criteria:

- Standard shipping costs for under 6 items
- Shipping is \$5 for 6-10 items.
- Shipping is free for more than 10 items.

Which of the following is the best black box test design technique for the user story?

- a) State Transition testing: Test the following states – browsing, logged in, selecting, purchasing, confirming, and exiting
- b) Decision tables: Test the following conditions – User logged in; At least 1 item in cart; Purchase confirmed; Funding approved; with the resulting action of – Ship Item.
- c) Boundary Value Analysis: Test the following inputs – 0,5,6,10,11,max
- d) Use Case Testing: Actor=customer; Prerequisites=customer logs in, selects and purchases items; Postconditions= items are shipped.

**Answer: c**

**Question: 4**

During an iteration planning meeting, the team is sharing their thoughts about a user story. The product owner advises that the customer should have one screen to enter information.

The developer explains that there are technical limitations for the feature, due to the amount of information needed to be captured on the screen. Another developer says that there are risks about performance as the information will be stored in an external offsite database.

Which of the following would best represent a tester's contribution to this discussion?

- a) The tester advises that the screen for the user story needs to be a single page to reduce test automation effort.
- b) The tester advises that usability is more important than performance
- c) The tester advises that performance acceptance criteria should standard maximum of 1 second for data storage.
- d) The tester advises that the user story needs acceptance criteria to be testable.

**Answer: d**

**Question: 5**

The business advises during iteration 5 planning that they require changes to the system delivered in iteration 3.

Of the following activities, which would need to be done first to minimize the introduction of regression risk when this feature is changed?

- a) Review and update all manual and automated tests impacted by this change to meet the new acceptance criteria.
- b) Write new manual and automated tests for the feature and add them to the regression test suite.
- c) Automate all test cases from the previous iteration and add them to the automated regression test suite.
- d) Increase the amount of test automation around the system to include more detailed test conditions.

**Answer: a**

**Question: 6**

Which of the following activities would a tester do during release planning?

- a) Produce a list of acceptance tests for user stories
- b) Help break down user stories into smaller and more detailed tasks.
- c) Estimate testing tasks generated by new features planned for this iteration.
- d) Support the clarification of the user stories and ensure that they are testable

**Answer: d**

**Question: 7**

Which tasks are typically expected of a tester on an agile project?

- i. decide on user acceptance
- ii. design, create and execute appropriate tests
- iii. schedule defect reports for analysis
- iv. automate and maintain tests
- v. improve program logic by pair programming

- a) i & iii
- b) ii & iii
- c) ii & iv
- d) ii & v

**Answer: c**

**Question: 8**

Which TWO of the following are examples of testable acceptance criteria for test related activities?

Select TWO options.

- a) Structure based testing: White box testing in addition to black box testing is used.
- b) System testing: At least 80% of functional regression tests are automated.
- c) Security testing: A threat risk analysis scan is completed with no faults identified.
- d) Performance testing: The application is responding in a reasonable amount of time with 5000 users.
- e) Compatibility testing: The application is working on all major browsers.

**Answer: b, c**

**Question: 9**

Which of the following statements is FALSE with respect to exploratory testing?

- a) Exploratory testing encompasses concurrent learning, test design, and execution.
- b) Exploratory testing eliminates the need for testers to prepare test ideas prior to test execution.
- c) Best results are achieved when exploratory testing is combined with other test strategies.
- d) Exploratory testers need to have a solid understanding of the system under test

**Answer: b**

**Question: 10**

Which of the following is NOT a typical task performed by the tester within an agile team?

- a) To automate tests and maintain them
- b) To mentor and coach other team members
- c) To produce and update burndown charts
- d) To participate in code analyzing activities

**Answer: c**

## What Study Guide Works Best in Acing the ISTQB CTFL-AT Agile Tester Certification?

The CTFL-AT study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

### Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the Agile Tester exam, getting in full touch of the [syllabus](#) is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

### Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

### Get Expert Advice from the Training:

Do not forget to join the ISTQB CTFL-AT training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

### Get Access to the PDF Sample Questions:

If your study material is in a [PDF format](#) or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

## **Avoid Dumps and Utilize the ISTQB CTFL-AT Practice Test:**

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, CTFL-AT practice tests always stand out to be the better choice than dumps PDF.

### **Avail the Proven CTFL-AT Practice Test for Success!!!**
