Enhance Knowledge with ACP-610 Sample Questions:

Question: 1

Your Scrum project only uses a single workflow. The workflow is shared with several other projects. You want to make sure users manually select and set a resolution during a particular transition.

As a project administrator, how can you achieve this?

- a) Request a screen with the Resolution field to be associated with the transition.
- b) Request a post function that sets the Resolution to be added to the transition.
- c) Check the 'Set resolution' option on the target status in the board configuration.
- d) Add the Resolution field to a transition screen and associate it with the transition.

Answer: a

Question: 2

You are the project administrator of multiple projects; all of which share a workflow and a permission scheme. One of the workflow transitions has a condition that allows only users with Schedule Issues permission to execute it. These users differ in each project and you need to manage them regularly.

Which entry needs to be added to Schedule Issues permission?

- a) Application access
- b) Group custom field value
- c) Single users
- d) Project Role
- e) Group

Answer: d

Question: 3

You need to determine the best way to meet these requirements:

- allow four separate functional teams to work in a single project
- use a field to designate the functional area for each issue
- allow each team to focus only on their own issues without a lot of maintenance
- allow each team to view a Burndown Chart of only their own issues

Which approach will meet all requirements?

- Use components to designate functional areas and create four boards filtered by component.
- Use versions to designate functional areas and create four boards with sub-filters by version.
- Use components to designate functional areas and create a single board with four quick filters by component.
- Use versions to designate functional areas and create a single board with four swimlanes by version.

Answer: a

Question: 4

A project has two security levels configured as shown.

| Security Level | Users / Groups / Project Roles |
|----------------|--------------------------------|
| Default | Project Role (Users) |
| Sensitive | Group (managers) |

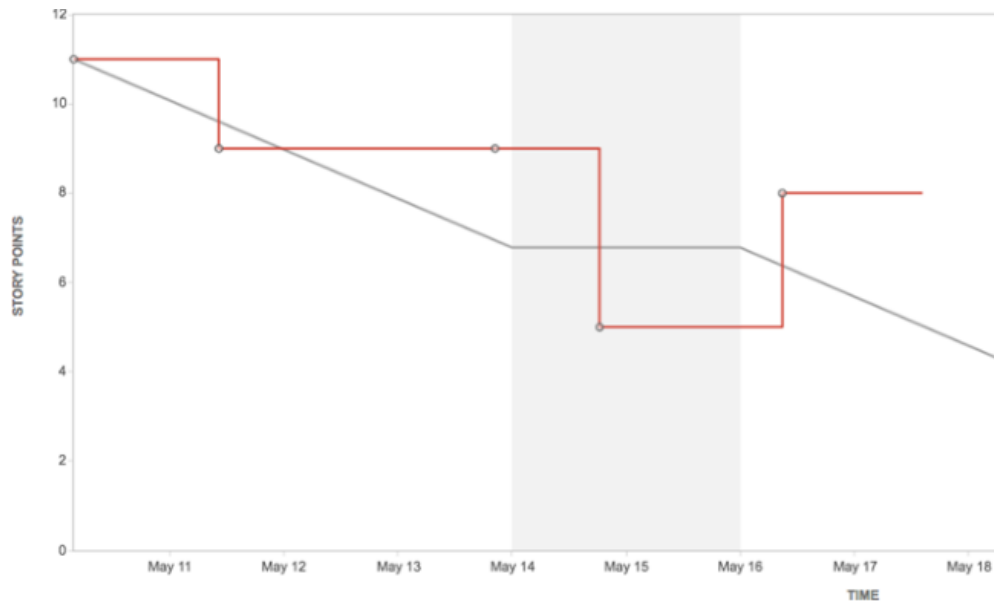

Some users complain that they can select only the Default level when creating issues, but not the Sensitive level. Identify the reason.

- They are not in the Managers role.
- They are not in the Users role.
- They do not have the Create Issues permission.
- They do not have the Set Issue Security permission.
- They are not in the managers group.

Answer: e

Question: 5

Review the Burndown Chart shown.

Click the image above to view details. Which two facts can definitely be derived from this chart? (Choose two.)

- a) At least one estimated issue was added to the sprint or an issue's estimate was increased.
- b) At least one unestimated issue was completed, added to, or removed from the sprint.
- c) Issues in this sprint are not broken down into small enough work segments.
- d) The team overestimated the work they can complete and will not meet the sprint commitment.
- e) The team underestimated the work they can complete and will meet the sprint commitment.

Answer: a, b

Question: 6

Avery is a project administrator with Jira Core application access. She wants to add a field to her project screen. Select four prerequisites for her to be able to do so. (Choose four.)

- a) The screen cannot be a transition screen
- b) The screen cannot be used by other projects.
- c) The field must already exist in Jira.
- d) The field must be optional.
- e) Avery must have Jira Software application access.
- f) Avery must have Extended project administration permission.

Answer: a, b, c, f

Question: 7

You notice a discrepancy:

- In search results, you see 20 issues in Open and Review statuses in your project.
- On the project board, you see only 10 issues in the Open and Review columns.

Which three configurations might explain this behavior?

(Choose three.)

- a) board filter
- b) board sub-filter
- c) column mapping
- d) issue-level security
- e) project permission
- f) global permission

Answer: a, b, c

Question: 8

Foogie has the following requirements:

- remove issues from the board that have been resolved for longer than 4 weeks
- do it in such a way that the issues still show up on reports

Identify two different ways to achieve this.

(Choose two.)

- a) modify the board sub-filter
- b) modify the board filter
- c) adjust the 'Hide completed issues older than' setting
- d) enable the Kanban backlog
- e) remove the Done column from the board

Answer: a, c

Question: 9

Your team has been using a Kanban board for the last six months. You want to forecast how many support requests they are likely to resolve in the next month based on past performance.

Which reporting tool will help you develop this forecast?

- a) Control Chart
- b) Cumulative Flow Diagram
- c) Velocity Chart
- d) Two Dimensional Filter Statistics gadget
- e) Average Age Chart

Answer: a

Question: 10

Gil, Tranh and Glory are the only members in the group called 'marketing_grp'. They are responsible for writing ad copy and want to use a quick filter to instantly identify their overdue ad copy.

Which two JQL queries will definitely provide the expected results? (Choose two.)

- a) issue type = "ad copy" and assignee in membersOf("marketing_grp") AND duedate <= startOfDay°
- b) type = "ad copy" AND assignee in (Gil, Tranh, Glory) drafts. m AND due <= "0"
- c) issue type = "ad copy" AND assignee =Gil OR IM assignee = Tranh OR assignee = Glory AND due <= "0"
- d) issue type = ad copy AND assignee in membersOf("marketing_grp") AND due = overdue°
- e) type = "ad copy" AND assignee in membersOf("marketing_grp") AND duedate <= currentLogin0

Answer: a, b

What Study Guide Works Best in Acing the Atlassian ACP-610 Jira Data Center and Server Certification Certification?

The ACP-610 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the Jira Data Center and Server Certification exam, getting in full touch of the [syllabus](#) is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

Get Expert Advice from the Training:

Do not forget to join the Atlassian ACP-610 training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

Get Access to the PDF Sample Questions:

If your study material is in a [PDF format](#) or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

Avoid Dumps and Utilize the Atlassian ACP-610 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, ACP-610 practice tests always stand out to be the better choice than dumps PDF.

Avail the Proven ACP-610 Practice Test for Success!!!
