## Get an Overview of the NS0-304 Certification:

Who should take the [NS0-304 exam](#)? This is the first question that comes to a candidate's mind when preparing for the NCHC Administrator certification. The NS0-304 certification is suitable for candidates who are keen to earn knowledge on the Hybrid Cloud and grab their NetApp Certified Hybrid Cloud Administrator. When it is about starting the preparation, most candidates get confused regarding the study materials and study approach. But NS0-304 study guide PDF is here to solve the problem. NS0-304 PDF combines some effective sample questions and offers valuable tips to pass the exam with ease.

## Why Should You Earn the NetApp NS0-304 Certification?

There are several reasons why one should grab the NS0-304 certification.

- The NCHC Administrator certification proves to be one of the most recognized certifications.
- The certification badge proves the knowledge of the candidate regarding subject matters and makes his resume presentable to potential candidates.
- Thus earning the [NetApp Certified Hybrid Cloud Administrator](#) is a powerful qualification for a prosperous career.

## What Is the NetApp NS0-304 NCHC Administrator Certification Exam Structure?

Exam Name	Hybrid Cloud Administrator
Exam Number	NS0-304 NCHCAD
Exam Price	\$150 USD
Duration	90 minutes
Number of Questions	60
Passing Score	64
Recommended Training	<a href="#">NetApp Public Cloud Services Fundamentals</a> <a href="#">Cloud Volumes ONTAP Fundamentals</a>

	<a href="#">OnCommand Insight: Fundamentals</a> <a href="#">StorageGRID Fundamentals</a>
Exam Registration	<a href="#">PEARSON VUE</a>
Sample Questions	<a href="#">NetApp NS0-304 Sample Questions</a>
Practice Exam	<a href="#">NetApp Certified Hybrid Cloud Administrator Practice Test</a>

## Enhance Knowledge with NS0-304 Sample Questions:

### Question: 1

Your organization's security policy requires centrally managed user rights with granular permission assignment capabilities for authenticated users to access the Spot by NetApp console.

Which method accomplishes this task?

- a) Configure integration with your organization's single sign-on (SSO).
- b) Enable Spot by NetApp's multifactor authentication (MFA).
- c) Create an access token and assign it to each user.
- d) Create a programmatic user account for each user.

**Answer: a**

### Question: 2

You are experiencing slow database queries from a compute instance running a relational database on Azure NetApp Files. In this scenario, what are three reasons for this issue?

(Choose three.)

- a) the automatic QoS quota size of the Azure NetApp Files volume 17
- b) the size of the compute instance
- c) a single root I/O virtualization (SR-IOV) driver in the compute instance with accelerated networking
- d) the number of snapshots to keep in the Azure NetApp Files volume snapshot policy
- e) a manual QoS throughput setting of the Azure NetApp Files volume

**Answer: a, b, e**

**Question: 3**

You have a 100 TB Cloud Volumes Service NFS volume called vol1. You are asked to create a second read/write test copy of the volume called vol1\_test.

In this scenario, what is the fastest supported method to create vol1\_test?

- a) Create vol1\_test from a Snapshot copy.
- b) Use Cloud Sync to synchronize vol1 to vol1\_test.
- c) Use SnapMirror to mirror vol1 to vol1\_test.
- d) Use rsync to copy vol1 to vol1\_test.

**Answer: a**

**Question: 4**

Which two storage protocols are supported by Cloud Volumes Service?

(Choose two.)

- a) FCoE
- b) SMB 3.0
- c) NFS v3
- d) NVMe

**Answer: b, c**

**Question: 5**

You have a cloud-connected storage system that is located in a collocation facility that uses a direct connect into AWS. The direct connect circuit is already configured, and it is working for the SVMs that were created earlier on the cluster.

You are creating a new SVM on the storage cluster in your collocation. You want your compute nodes in AWS to be able to connect to the storage on the newly created SVM.

Which two steps must you perform to accomplish this task? (Choose two.)

- a) Create VLAN interface ports on cluster nodes.
- b) Set up a network connection to the Internet in the collocation.
- c) You must have an AWS Elastic Network IP (EIP) attached to the compute nodes in AWS.
- d) Create the protocol LIFs on the SVM that uses the VLAN interface ports.

**Answer: a, d**

**Question: 6**

You are managing a large NetApp hybrid cloud estate across your business and are experiencing VM performance problems. You are asked to investigate. You need a tool that provides monitoring capabilities and enables you to solve specific issues quickly. Which NetApp tool would you deploy to satisfy these requirements?

- a) NetApp Cloud Compliance
- b) Spot Eco by NetApp
- c) NetApp Cloud Insights
- d) NetApp Cloud Manager

**Answer: c****Question: 7**

Which hypervisor would be deployed using NetApp Deployment Engine?

- a) Red Hat Virtualization
- b) VMware vSphere
- c) Citrix Xen
- d) KVM Correct

**Answer: b****Question: 8**

You are an administrator of your NetApp Cloud Volumes ONTAP system in AWS. You want to tier backup data from the data protection volumes in your system to object storage to lower costs. You are aware that some of the requirements for data tiering are met automatically by NetApp Cloud Manager. In this scenario, which two criteria must be satisfied before enabling tiering from NetApp Cloud Manager? (Choose two.)

- a) Ensure that you have tiering enabled on the aggregate in which your data protection volume exists.
- b) Ensure that you have internal connectivity using the VPC endpoint to the Amazon S3 service.
- c) Ensure that you have installed a tiering license before enabling data tiering from NetApp Cloud Manager.
- d) Ensure that you have created an Amazon S3 bucket before you enable tiering from NetApp Cloud Manager.

**Answer: a, b**

**Question: 9**

You are provisioning a single node NetApp Cloud Volumes ONTAP instance in the public cloud. In this scenario, which two LIFs are configured by Cloud Manager by default?

(Choose two.)

- a) cluster management LIF
- b) intercluster LIF
- c) Storage Virtual Machine (SVM) management LIF
- d) FC data LIF

**Answer: a, b**

**Question: 10**

What are two requirements when using SaaS-based NetApp Cloud Manager to deploy an instance of Cloud Volumes ONTAP?

(Choose two.)

- a) A NetApp Connector in your cloud or an on-premises network is required.
- b) A service account needs to deploy it.
- c) An account administrator needs to deploy it.
- d) A storage gateway in your cloud or an on-premises network is required.

**Answer: a, c**

# What Study Guide Works Best in Acing the NetApp NS0-304 NCHC Administrator Certification?

The NS0-304 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

## Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the NCHC Administrator exam, getting in full touch of the [syllabus](#) is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

## Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

## Get Expert Advice from the Training:

Do not forget to join the NetApp NS0-304 training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

## Get Access to the PDF Sample Questions:

If your study material is in a PDF format or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

## Avoid Dumps and Utilize the NetApp NS0-304 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform

well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, NS0-304 practice tests always stand out to be the better choice than dumps PDF.
