Enhance Knowledge with C1000-129 Sample Questions:

Question: 1

IBM Security Verify Access is configured to use the IBM Security Directory Server with forms-based login for user authentication. What are the three primary sizing considerations for the IBM Directory Server scenario?

- a) Authentication rate
- b) High volume database
- c) Session management server database
- d) IBM Security Verify Access data model
- e) DB2 high availability and disaster recovery
- f) Size and number of LDAP attributes inserted in the credential

Answer: a, d, f

Question: 2

When identifying federated single sign-on scenarios, what key piece of information is essential in building out an authentication flow?

- a) What to name the federation partners
- b) Whether to use RSA or Elliptic Curve signing and verification
- c) Whether or not the partner has a highly available solution
- d) Whether IBM Security Verify Access is acting as an identity provider or service provider

Answer: d

Question: 3

Alex wants the latest firmware upgrades to be automatically available for installation on an IBM Security Verify Access deployment. Alex set up network connectivity between the appliance and an online update server.

Which additional step is necessary for this to succeed?

- a) Install a valid license file.
- b) Apply at least one activation level to the appliance.
- c) Obtain latest version of eAssembly from IBM Passport Advantage.
- d) Configure a new IP address on the appliance for downloading from update server.

Answer: a

Question: 4

Why are multiple IP addresses in an IBM Security Verify Access appliance recommended?

- a) To assure correct routing of requests
- b) To make the appliance easier to configure and manage
- c) To clearly and securely separate management traffic from runtime traffic
- d) To prevent congestion when communication is restricted to a single IP address

Answer: c

Question: 5

Which core IBM Security Verify Access capability is supported for basic users?

- a) Failover cookies
- b) Per-user password policy
- c) Global sign-on (GSO) lockbox
- d) Access control lists (ACL) for individual users

Answer: a

Question: 6

Which user name must be used to log in to the local administrator account when using external LDAP management authentication?

- a) admin@isva
- b) admin@local
- c) admin@internal
- d) admin@appliance

Answer: b

Question: 7

Complex authentication scenarios based on custom conditions can be implemented in Advanced Access Control. To add a branching workflow to a policy, a Decision can be added to the policy workflow steps.

Select three references a Decision can contain.

- a) Risk profile
- b) API contract

- b) ReadWrite
- c) Immutable
- d) AdminWrite

Answer: c

Question: 10

Which two capabilities are part of the Advanced Access Control offering?

- a) SAML authentication
- b) Application firewall
- c) Security Token Service
- d) Advanced authentication service
- e) API protection (OAuth and OIDC)

Answer: d, e

What Study Guide Works Best in acing the IBM C1000-129 Security Verify Access Deployment Certification?

The C1000-129 study guide is a combination of some proven study tips and the combination of all valuable study materials like sample questions, syllabus and practice tests in one place.

Explore the Syllabus Topics and Learn from the Core:

If you are determined to earn success in the Security Verify Access Deployment exam, getting in full touch of the [syllabus](#) is mandatory. During preparation, you might not like all syllabus sections or topics, but try to get at least the fundamental knowledge from the sections you don't like. The more you possess

knowledge on all syllabus sections, the more is the chance to attempt maximum number of questions during the actual exam.

Make Your Schedule:

Studying and completing the syllabus becomes easier, if you work on the syllabus topics after making a schedule. Your syllabus must mention what areas you want to cover and within what time. Once you make a schedule and follow it regularly, syllabus completion becomes easier and preparation becomes smoother.

Get Expert Advice from the Training:

Do not forget to join the IBM C1000-129 training if it is providing any. Training enhances the practical knowledge of a candidate, which helps them to work well in the practical field during projects.

Get Access to the PDF Sample Questions:

If your study material is in a PDF format or the materials are mobile-friendly, what could be better than that? Get access to the free sample questions and keep enhancing your knowledge beyond the syllabus.

Avoid Dumps and utilize the IBM C1000-129 Practice Test:

Why should you rely on practice tests? The reason is simple: you must get familiar with the exam pattern before reaching the exam hall. An aspirant aware of the exam structure and time management during the exam preparation can perform well in the actual exam and attempt the maximum number of questions during the exam.

Many aspirants prefer to read from dumps, but they miss out on the self assessment method. Therefore, C1000-129 practice tests always stand out to be the better choice than dumps PDF.

Avail the Proven C1000-129 Practice Test for Success!!!
